PROFESSIONAL SUMMARY

AI Engineer and Data Analyst with an M.Sc. in Data Science (SASTRA, 2026) and a University Gold Medal in BCA. Currently building LLM-powered career assistance features for a job portal at HBSPL using Python and FastAPI. Previously built a hybrid product recommendation engine with vector search for a Shopify client and a stroke-detection deep learning model (97.3% accuracy) with explainable AI. Solid foundation in SQL, Python, Power BI, and machine learning.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, Java (Basic), PostgreSQL, MySQL, SQLite

AI & Machine Learning: Machine Learning, Deep Learning (PyTorch), NLP, Generative AI, Large Language Models (LLMs), Recommendation Systems, Feature Engineering, Model Evaluation, Computer Vision (VGG19, YOLOv8), Explainable AI (Grad-CAM), SentenceTransformers, Vector Search (Qdrant)

Data Analytics & BI: Data Cleaning, Exploratory Data Analysis, Statistical Analysis, Data Visualization, KPI Development, Power BI, Excel, Google Analytics 4 (GA4)

Backend & Tools: FastAPI, REST APIs, Docker, Redis, Celery, Git, GitHub, VS Code

PROFESSIONAL EXPERIENCE

AI Engineer & Data Analyst | Hirelyz Business Solutions Private Limited (HBSPL) **Sep 2026 – Present**

- Develop AI-powered career assistance features for a job portal, building Python services and integrating them through FastAPI APIs.
- Work on natural-language job search and job-specific question answering by integrating Generative AI and Large Language Models (LLMs).
- Build resume parsing and candidate profile analysis workflows that turn unstructured resumes into structured candidate data.
- Analyse job descriptions to support candidate-job matching, skill-gap identification, and career insights.
- Process and analyse data to produce analytical insights, and evaluate AI-generated outputs to improve result quality.

Software & Data Science Intern | The Abstract Apps Pvt. Ltd., Chennai **Jan 2026 – May 2026**

- Built an AI-powered product recommendation engine for a Shopify client, generating semantic embeddings for ~750 products (SentenceTransformers, all-MiniLM-L6-v2) and indexing them in Qdrant for vector similarity search.
- Combined content-based similarity with co-purchase patterns from order data to support hybrid recommendation logic.
- Exposed recommendations through FastAPI endpoints and integrated them into the client's "Related Products by TAA" Shopify app.
- Worked with PostgreSQL, Redis, Celery, and Docker for product data, background tasks, and containerised deployment setup.

PROJECTS

Attention-Enhanced VGG19 for Stroke Detection from CT Images **M.Sc. Project, SASTRA**

Python, Deep Learning, VGG19, CBAM, Grad-CAM

- Built a VGG19 + CBAM (channel and spatial attention) model to detect stroke from brain CT scans, using train/validation/test splits.
- Achieved ~97.3% accuracy, 0.96 precision, 0.97 recall, and 0.96 F1-score.
- Applied Grad-CAM to visualise the CT regions driving each prediction, making the model explainable.

Sales Performance Dashboard **Portfolio Project**

Power BI, Data Cleaning, KPI Development

- Designed an interactive dashboard tracking revenue, profit, quantity sold, and performance by product, category, and region.
- Cleaned data and built KPIs and filters to surface top-performing products, categories, regions, and sales trends over time.

EDUCATION

M.Sc. Data Science | SASTRA Deemed to be University, Thanjavur **Jul 2024 – Apr 2026**
CGPA: 7.30/10

Bachelor of Computer Applications (BCA) | Selvam Arts and Science College, Namakkal **Oct 2021 – May 2024**
CGPA: 8.84/10 | University Gold Medalist (Periyar University)

CERTIFICATIONS

- Data Analytics Traineeship – Maiyyam Knowledge and Careers Pvt. Ltd. (Jan 2026)
- Data Analytics Job Simulation – Deloitte Australia
